

Mirror Mirror on the wall, which team is the most effective of all?

The team that has the courage to look into the mirror to measure how aligned they are, dive into the conversation to examine their gaps, and commit to action.

Using Mirror Mirror's proprietary diagnostic, we identify and measure where people are and are not on the same page across a range of cognitive and behavioural indicators and help them to recognise issues, prioritise and agree on actions.

Want to try before you buy?
Contact us today to arrange a free demo scan.

All you need is a team of between 5–20 people and you're good to go. The Mirror Mirror demo scan is a 12-question demo version of the full Team Reflector report.

The report includes one qualitative question on team purposes (reported verbatim), and 11 quantitative questions to capture data on key opinion and behaviour indicators.

We'll then run a facilitated one-hour debrief to explore your team's results.

If you're a board director, executive or senior leader, or heading up a change or transformation project, get in touch with us to find out how **we can help your business sing.**

Book a no-obligation introductory call now to find out more.
